Features

We are happy to announce the upgraded Cabinet 2500 cooling system. The new 2500 Cabinet system has evolved into a unit that can #KOOL at two capacities at the flip of a switch. We have also added centrifugal blowers, which are significantly quieter, and the evaporator blower can also be set at a medium or low speed. In addition, the condenser (exhaust) blower has been upgraded to an ECM fan, capable of automatically adjusting speed to provide the ideal airflow needed to dissipate excess heat.

*Suggested cubic footage rating assumes cellar is properly sealed and insulated with a minimum R19 insulation value. Materials such as glass, stone, concrete, etc., will negatively affect the insulation value. Each wine cellar is unique, and heat load calculations should always be performed prior to selecting a cooling unit.
